

Return to the “Classic” *PRO*-Ohio Two-Sided Student Response Scan Sheet

In our ongoing effort to ensure the *accuracy* of student and teacher information and to keep your costs low, we are reverting to pre-printing (slugging) student information on the four-test subject (two-sided) Student Response Sheet this semester.

Side 1 contains “slugged” Student Information

Student name printed for ease of distribution

Teacher Name pre-printed per your school data file

Student Name “bubbled-in” that accurately matches Student ID in your school data file

Test Form to be marked by student for quality control

Student unique ID “bubbled-in” accurately

Demographic codes accurately marked per your school data file

Pre-printed scan sheets will save teacher class time by having student information already filled-in. This will also ensure that students names in the test reports are accurate. Scan sheets are printed in the order you have determined in your school data file. Both sides of the sheet are shown on the next two pages.

Main points to keep in mind:

- You **MUST** email your student-class school data file **3-4 weeks** before the test date.
- Your school data file should be organized (sorted) in the order you intend to **distribute** the student scan sheets.
 - Sort and group by class teacher if you intend to test in each teacher’s classroom
 - Sort and group by homeroom teacher if you intend to test in homeroom teacher’s room.
- Student scan sheets should be **collected** by teacher-class groups in order for your *PRO*-Ohio diagnostic reports to be generated by each teacher’s individual class group.
 - The **Teacher Cover Sheet** placed over each student set determines how class grouping reports are generated in the *PRO*-Ohio School Reports program.
- The number of scan sheets will vary depending on how many teachers each student has.
 - Further information on determining scan sheet counts is contained in the Scansheet Order Form and **PRO-Ohio User Guide** online at <http://pro-ohio.com/support.html>
